# Introduction

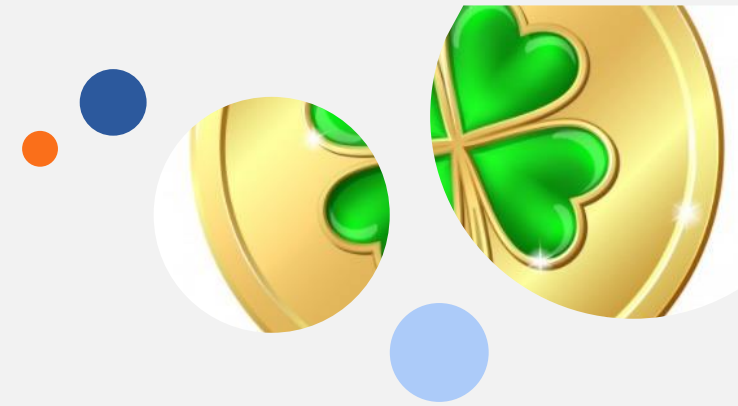

This coin is created by Grupo De La Hoz on 2021.

The company was founded on 2020 by Miguel De La Hoz in Spain.

Originally named Team HZ the company changed this name to accomplish quality standards since the company was adding new business models to its structure.

# Introduction

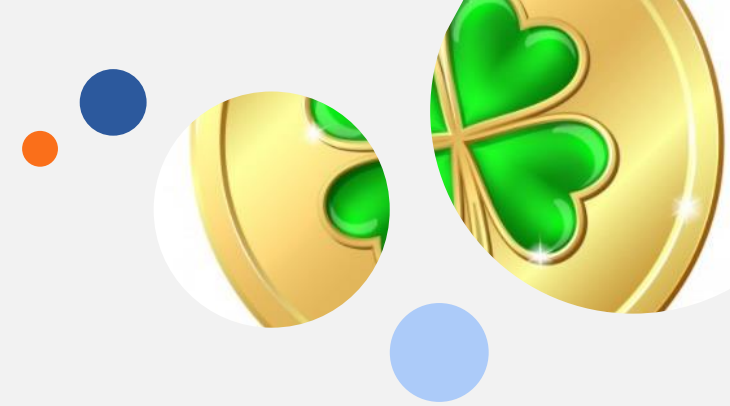

## 01

- Blockchain-powered digital currencies, or cryptocurrencies, hold the massive potential to disrupt the financial market they can be issued and used without the involvement of a central bank or other traditional financial institutions.
- All fiat money in circulation today is owned by the central and commercial banks that are in hands of individuals. A bank holds a liability to the depositor but can use depositor's money to give loan to somebody else.

## 02

- With cryptocurrencies, funds are owned by individuals who hold the keys – it is a fundamental difference between crypto and conventional banking. The technology that fortifies cryptocurrencies, the distributed consensus ledger (DCL), revolutionizes crypto transactions. It provides comprehensive and secure transaction records without using a central registry. This forges the path for peer-to-peer transactions, making third party functions redundant.

# Problem statement

## 01

- The currency monetary system, driven by fiat currency, is plagued by serious problems like time-consuming and expensive transactions, limited accessibility to the national currency, money-laundering and more. The following points elaborate on the problems with fiat currency.

## 02

- As with fiat currency, domestic and international money transfer takes days or even weeks to go through. Specifically for international transactions, every cross-border transaction has to traverse through correspondent banks responsible for managing activities like receiving and collating payment messages before retransmitting confirmation or denial to respective banks. This increases the settlement time of transactions.

# Problem statement

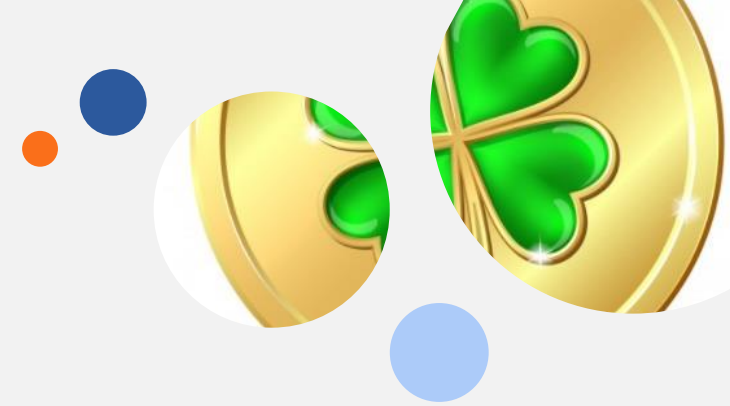

03

- Today many businesses rely on timely deliveries which are shipped when transactions are processed. A delay in transactions means a delay in the shipping of orders that can cost companies millions in lost revenue and productivity.

04

- Conventional banks charge somewhere between 0,5 percent and 5 percent to transfer money. Apart from this, banks also charge an additional one-off fee for the transaction and offer worse than the market exchange rate cross-border transactions. This can result in businesses losing between 1 percent and 5 percent of potential earnings on transfer fees alone. This elevates the prices of products for consumers and reduces wages as businesses try hard to cut costs to make a profit.

# Problem statement

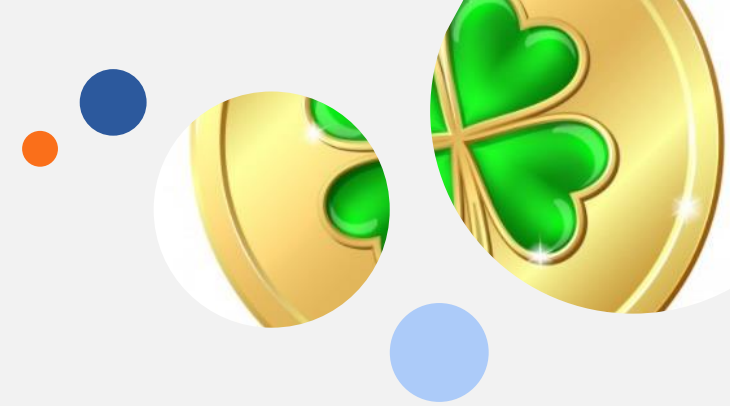

o5

- A major problem with fiat currencies is hyperinflation. Hyperinflation occurs when the price of goods and services increases by over 50 percent a month. As governments control fiat currency they can print as much money as they like which devalues the money in circulation. The most upsetting example of this is Venezuela. The country registered approximately 54,000,000 percent overall inflation rate since the year 2016. The native currency of Venezuela devalued by more than 95 percent making residents suffer extreme poverty and no access to basic human needs coverage.

o6

- Arbitrarily increasing the quantity of currency in an economy has an adverse effect on the distribution of money and thus redistributes purchasing power, stealing wealth from the majority such as wage workers and savers to serve interests of privileged minority. Redistribution of wealth leads to a net loss of wealth to society. Government deficit spending which should otherwise be motivated by good intentions alters the quantity of currency in circulation and results in currency debasement.

# The solution

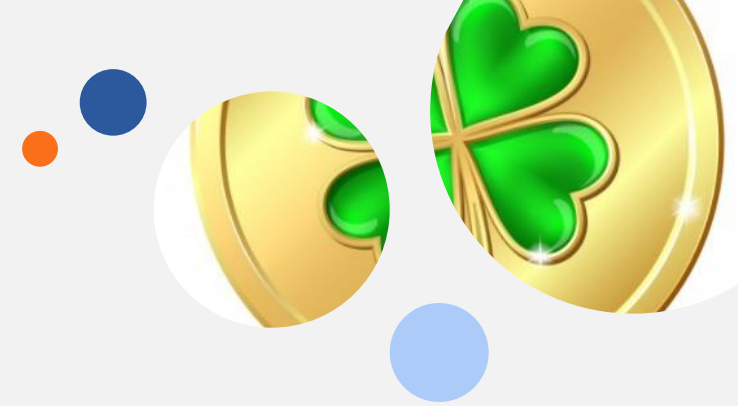

## 01

- Ametrino (AMIO) offers a comprehensive solution to the major problems faced by the traditional fiat-driven monetary system. AMIO envisions building a crypto-powered ecosystem comprising AMIO wallet, cryptomarket, exchange, and more, to effectively replace fiat currency while empowering users to harness the power of crypto in all types of transactions from this ecosystem to international payment solutions.

## 02

- AMIO is created as a BEP20 token that can be bought using BNB, Ether, and other coins as it grows in swaps. The sale of AMIO will be carried out through an Initial Coin Offering (ICO), which will be carried out in two phases – Private sale and Public sale. While Private sale will be for the Team and Advisors, The Public sale will allow anyone across the globe to participate in the sale and buy AMIO.

# The solution

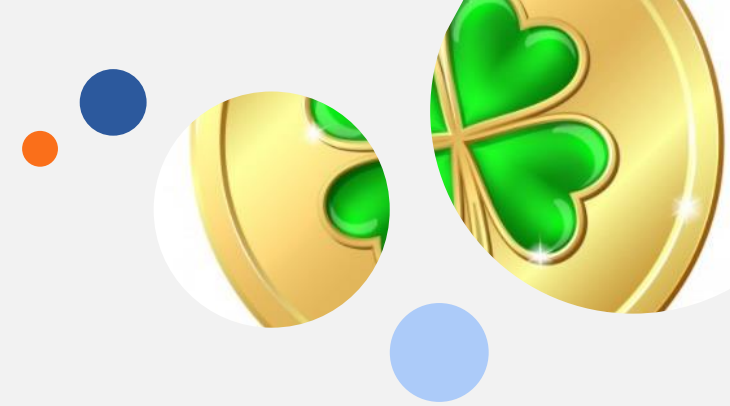

## 03

- Designed on Binance Blockchain, AMIO will allow accelerated transactions and lower transaction fees. AMIO will play a chief role in driving transactions on all Zilenia platforms such as Zilenia Marketplace, Zilenia Inmo, Zilenia Travel, Zilenia Cryptomarket and Zilenia Academy. AMIO will also be the backbone of the Zilenia referral program.

## 04

- Zilenia wallet will be a mnemonics-based secure mobile wallet to send, receive and store AMIO. Initially this wallet will support Bitcoin, Ethereum, BNB and AMIO.
- Zilenia wallet will completely respect the privacy of the users, enabling users to have complete control of their assets. A special private key will allow users to recover their wallets.

# The solution

05

- The security of Zilenia wallet will be achieved with the integration of industry-leading security features like multisig and biometric authentication. The multisig feature will require more than one user to authenticate transactions thus eliminating the risk of a single point of failure, and thereby fortifying the security of the wallet. Similarly biometric authentication (facial recognition) will reinforce the security of Zilenia wallet by enabling only legitimate users to process transactions.

06

- Zilenia Market is an e-commerce portal wherein users can register either as buyers or sellers to buy or sell diverse variety of products respectively. The products available on the platform will range from electronic goods to home decor products to health and beauty products to automotive and more. The platform buyers will be able to enjoy an added advantage of getting extra AMIO when buying here using AMIO.

# Search engine

Visitors can use this search engine at [zilenia.com](https://zilenia.com) or affiliated sites.

Search results are contents that have been created by the community.

You can see content author when you check search results.

Users are rewarded with AMIO as they use this search engine.

# Social network

Visitors can create an account to build a profile using name, surname and picture.

Members of this community meet each other while they add contents to groups that have been created by the users themselves.

Members are rewarded with AMIO by using all features available in this platform.

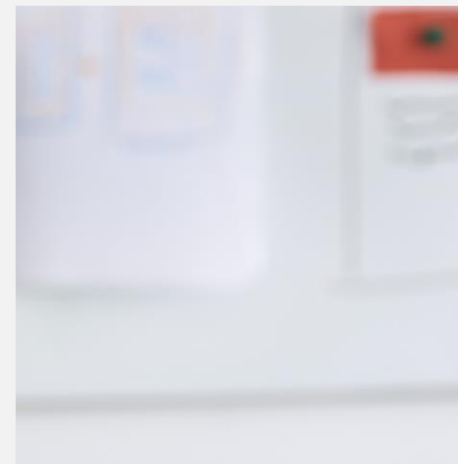

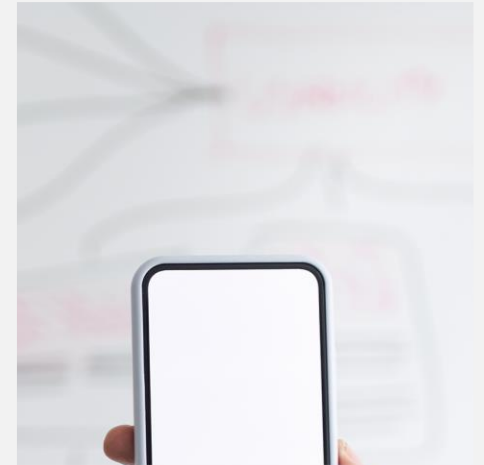

# Wallet

Users will have a wallet that can be used to hold AMIO, transfer AMIO or pay using AMIO.

Transfer AMIO to other users is possible through the network when both users have an account in the social network.

Users will also be able to exchange AMIO to other coins as Bitcoin, Ethereum, Litecoin, etc.

# 3D World

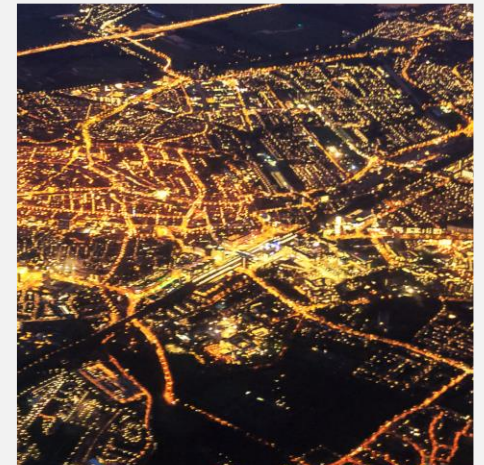

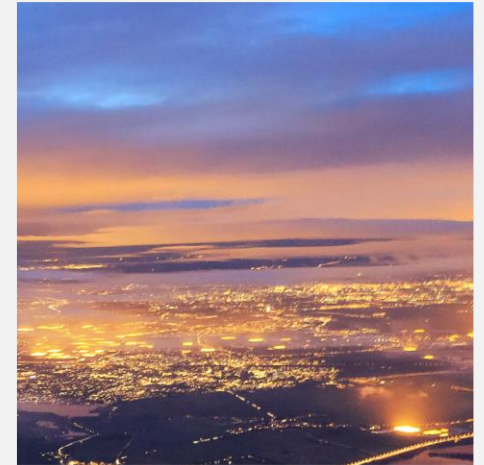

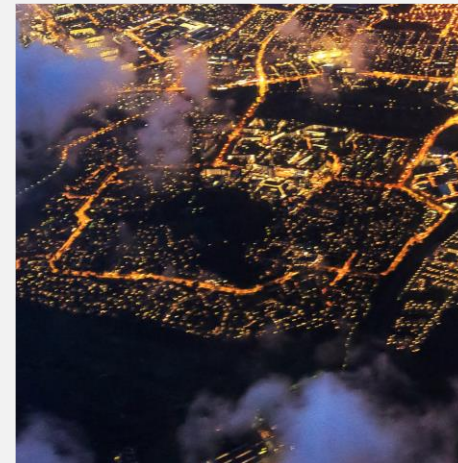

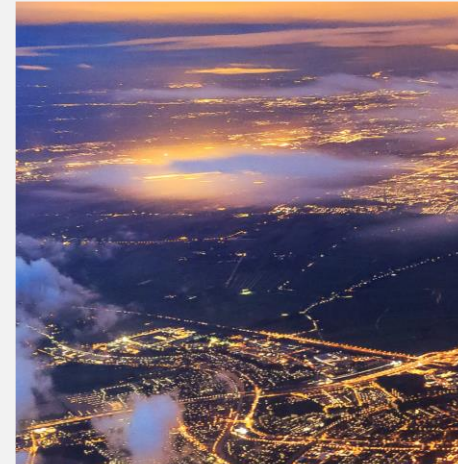

Users can login to a metaverse using their social network account.

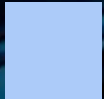

Inside this metaverse a user will create an avatar to move around.

The user can buy a field to build a house or shopping centre.

After that the owner of that house can sell it or exchange the virtual house for a real one using its value in AMIO as credit for this transaction.

Payments in this metaverse are made by using AMIO. This activity will pump up Ametrino's value for sure.

# Ametrino Future

2020 - 2022

# Growth factor

## Stage 1

2021

2021

2022

### AMIO launch

First coin buyers will buy at low price. As soon as coin is launched a 3D world will be developed in 9 months time.

## Stage 2

2022

2022

2023

### Selling 3D fields

First 3D users will be able to buy fields at low price using AMIO. As AMIO is used it will make prices go up.

## Stage 3

2023

2023

2024

### Buying and selling

Not only fields in 3D world but any kind of products will be marketed through a full marketplace using AMIO as payment option.

## Stage 4

2024

2024

2025

### Real homes

Users can exchange a virtual house for a real one using the virtual value as credit to get the house in real world.

# Advanced features

## Search engine

Usefull feature for most users

## Marketplace

Everyone can buy and sell

## Social network

Users meet and connect

## Marketing tools

Business addons for commercial use

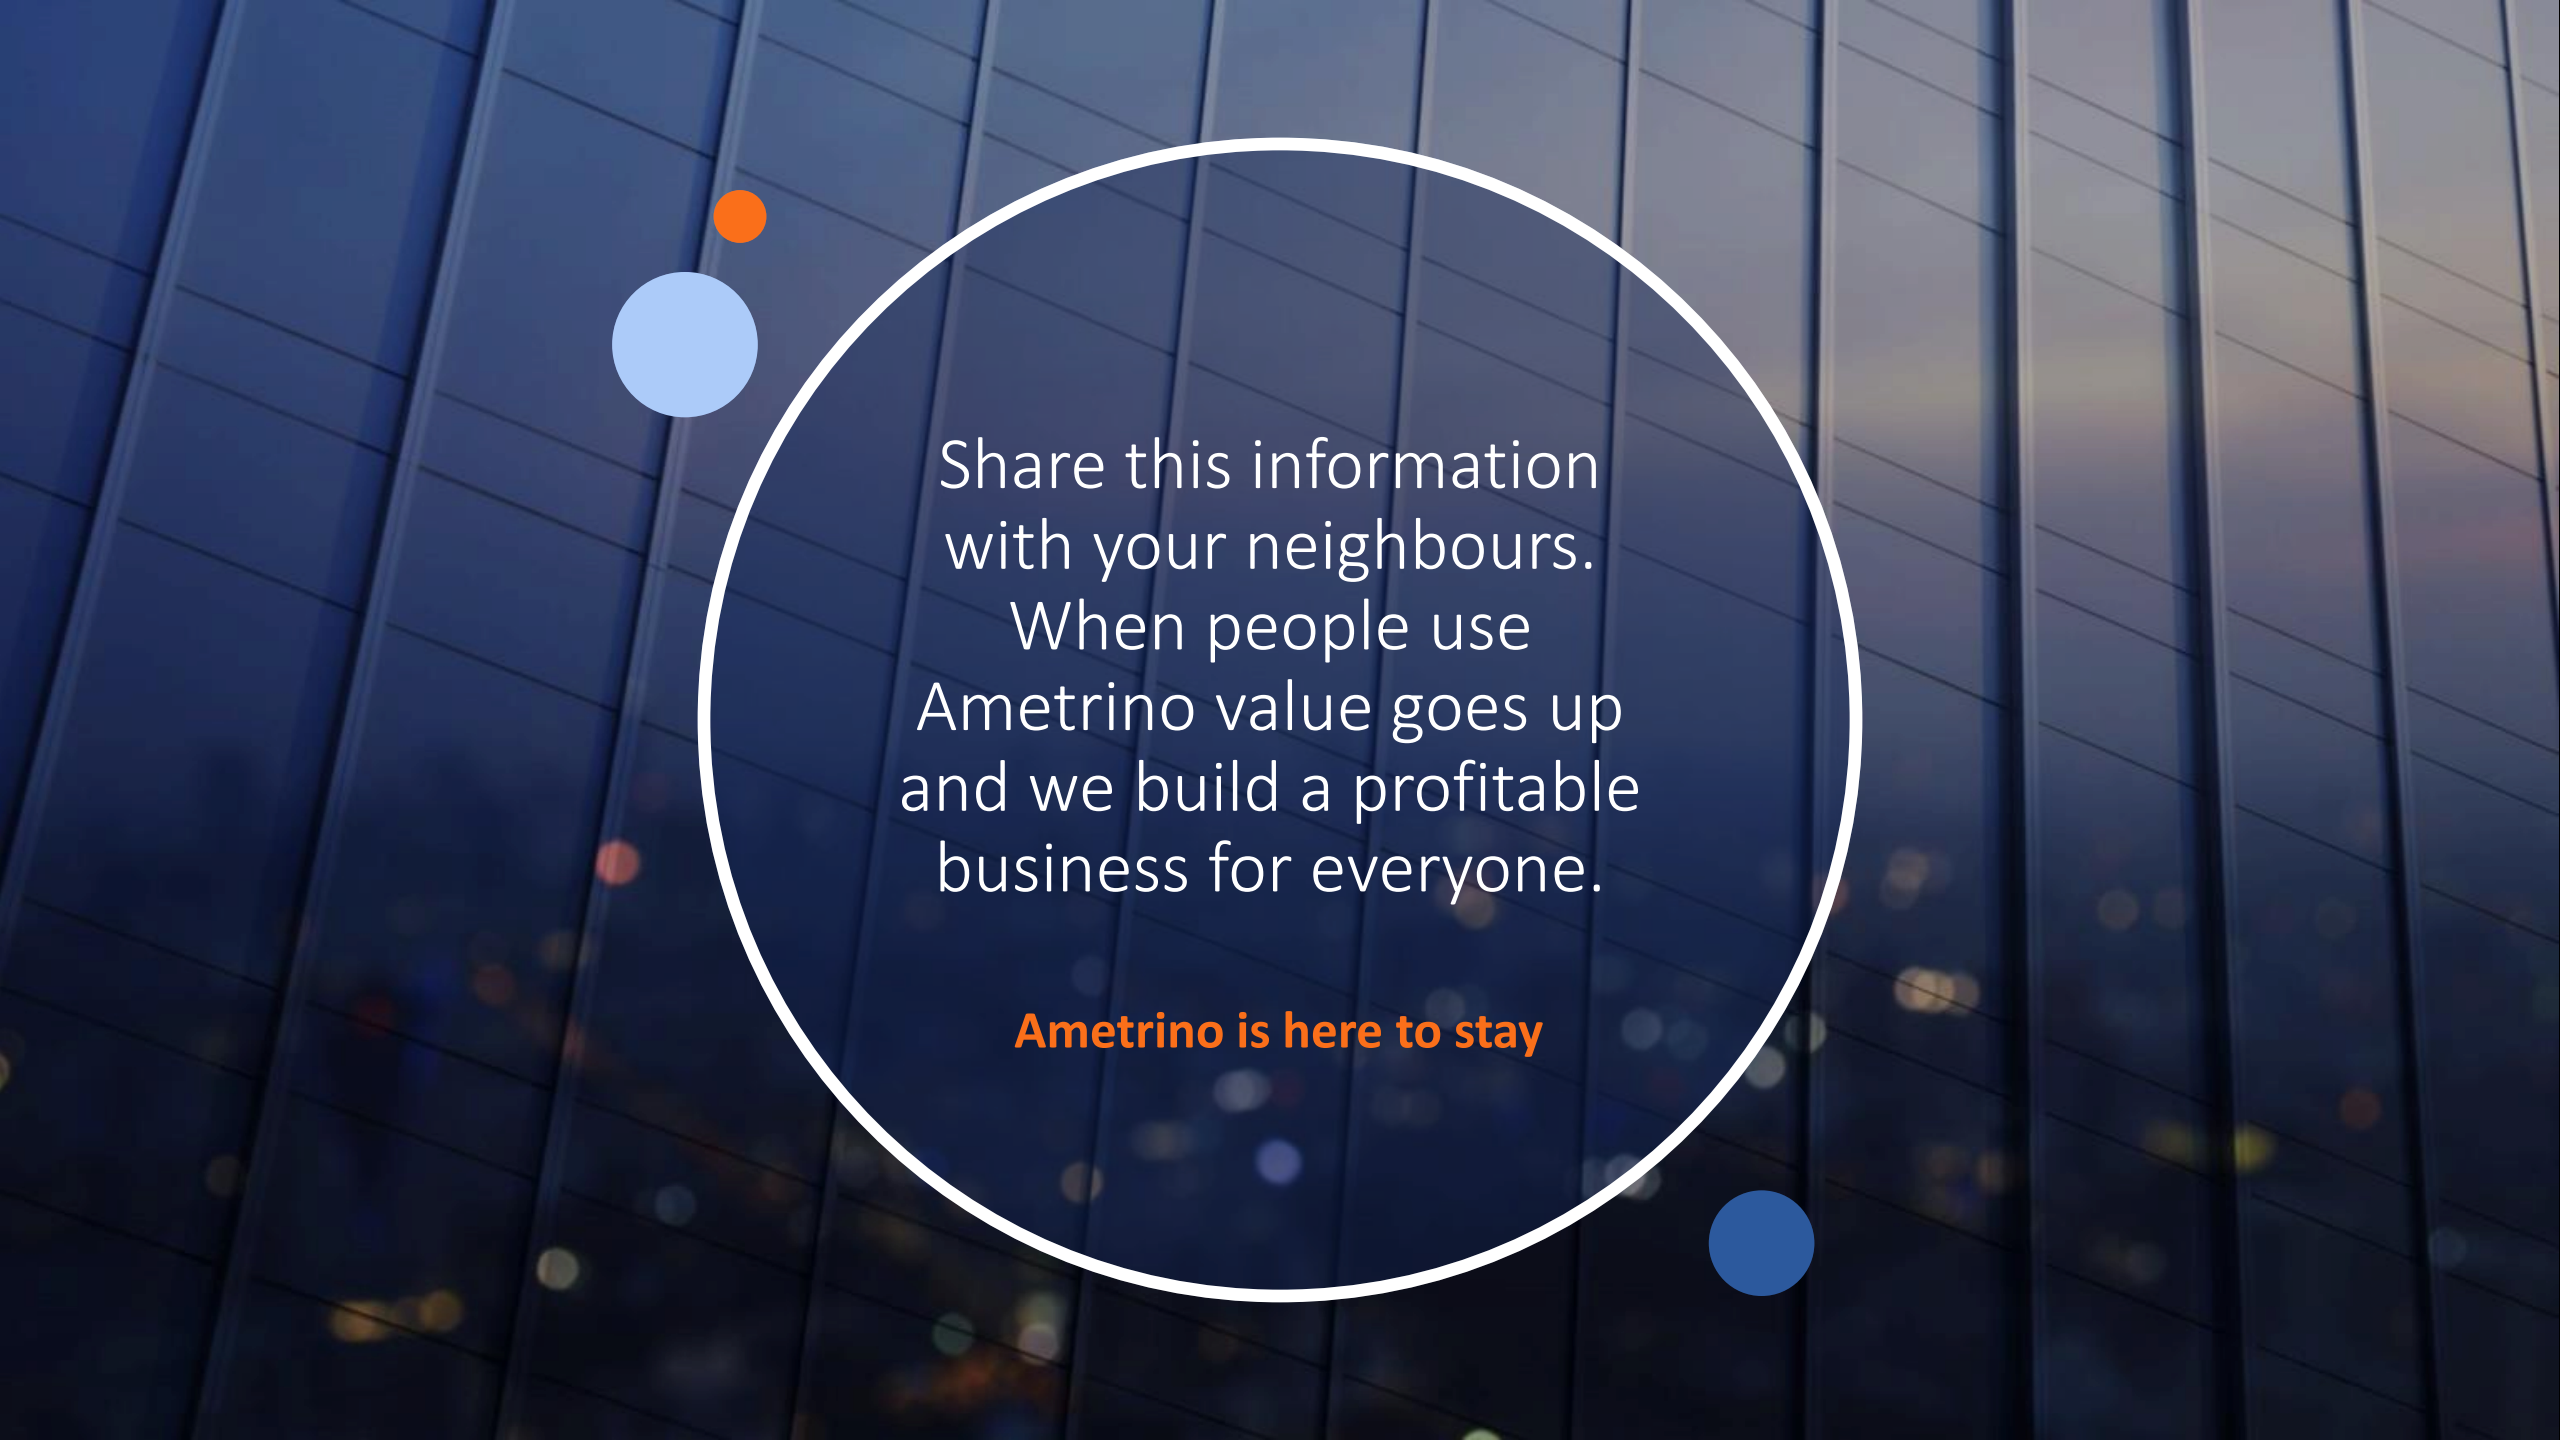

## Public documentation

Documents are available

## Share everywhere

Users will bring new members by sharing

Share this information  
with your neighbours.  
When people use  
Ametrino value goes up  
and we build a profitable  
business for everyone.

**Ametrino is here to stay**
